

Advanced functionality and Gigabit performance for managers requiring exceptionally responsive IP telephony services

OVERVIEW

The first **Gigabit telephone** to be offered by 3Com, the 3103 Manager Phone gives business professionals—managers, executives and conference participants—a **full complement of productivity-enhancing features** and an exceptionally informative and responsive user interface.

Sharp acoustics and ergonomics-inspired design encourage collaboration and help increase productivity. A unidirectional microphone in the full-duplex speakerphone enhances hands-free conversations. Wideband audio technology design enables high-clarity audio handset and headset attachments.

For **optimum performance and easy access to a wealth of call information**, this multiline phone provides a large 320x120-pixel display augmented by 10 softkeys and a four-way cursor control. Users can access features such as account codes or zone paging via the large display or one of the eight programmable feature buttons.

The 3Com® 3103 model also provides two switched 10/100/1000 ports that allow **Gigabit-speed network connectivity** for other desktop digital devices.

Self-locating capabilities save time and service-call expenses, lowering total cost of ownership. Moving a phone involves simply plugging it into a network port at a new location. All personal settings, directory entries and voice mail travel with the phone. Browser-based management eases configuration tasks, and web-based support makes advanced features easier to master. What's more, customization capabilities let users do many set-up procedures themselves.

KEY FEATURES

- › Two switched 10/100/1000 uplink ports (Gigabit)
- › Eight programmable buttons with lights
- › 10 fixed feature buttons
- › Wideband audio-ready
- › Large message-waiting LED
- › Large display with four-way cursor control and 10 softkeys
- › Full-duplex speakerphone
- › Oversize buttons for most-used features
- › Replaceable faceplate for localization
- › Power over Ethernet support (802.3af)
