

SolarAlert

Wireless Emergency Notification System

By **BRG**
PRECISION
PRODUCTS

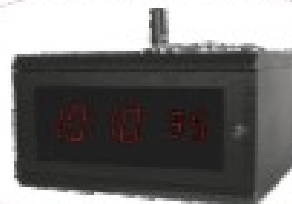

This wireless emergency notification system will save lives in an emergency by providing facility/campus wide verbal and text notifications at the click of a mouse. Save up to 66% compared to the price and easier to install than a wired system. The system allows you to add an unlimited number of clocks, speakers and moving message displays. The system automatically adjusts for Daylight Savings Time. All analog clocks come with a 5-year maintenance free battery pack.
